

## 650 Litre Diesel Fuel Cell

The **Red Fox Diesel Fuel Cell** has 650 litre capacity, and is fully portable.

It can be loaded into the back of a ute, in a trailer or it can be trolley mounted, making it easy to get into tight locations.

It runs a high speed 12 volt fuel pump with Anderson plug connection and has the same pump rate as high flow service station pumps. Twice filtered, it guarantees a clean diesel fuel fill.
